

PET HEALTH CARE

BY VITAR

COMPANY PROFILE

We are VITAR Veterinae, a proud subsidiary of VITAR, a brand synonymous with products that help people lead a healthy lifestyle. VITAR Veterinae was established in 2014 and specialises in making supplements for pets, particularly cats, dogs and horses.

We at VITAR Veterinae think that just like us humans, every pet is unique externally and physiologically, and therefore also deserves the best of care. Inspired by the clear benefits of supplements for people, our remit is to create items that provide the same level of treatment for pets. Our selection of vitamins, mineral substances and other food supplements is being gradually extended, based on the essential needs of pets.

VITAR Veterinae's portfolio of products embraces vitamins, minerals and food supplements. The entire research and development process and production take place in-house in the Czech Republic. The wide portfolio of products comprises standard and customised items.

Our mission is: "Helping people and animals lead better lives..." – our mission statement highlights the commitment of both VITAR and VITAR Veterinae for a healthy and active lifestyle.

Our growing product range comprises:

- Formulations for the healthy joints of cats, dogs and horses – ArtiVit, ArtiVit Forte, ArtiVit Pegas Forte, ArtiVit Pegas MSM
- Dental care products for removing tartar and plaque – DentON
- Preparations for boosting the immunity of pets in the form of vitamins and minerals, also to encourage healthy bones and glossy fur
- A mixture of probiotics & prebiotics – GasterON
- Natural oils for cats, dogs and horses, especially for boosting the intake of omega 3 fatty acids
- Anti-parasitic preparations and shampoo

Our goods contain components of the highest quality and are produced in accordance with the strictest international standards.

ENJOY MORE QUALITY TIME WITH YOUR LOVED PET

Most of our preparations are designed for long-term use. We are aware how tricky it can be to convince your pet to swallow a tablet, which is why our preparations are available in the form of a syrup, oil or powder that are easily mixed with food. Our aim is to make caring for your pet as simple as possible.

CHOOSE YOUR MOST CONVENIENT SIZE

Most of our products are available in different sized packs, so there is sure to be one most suitable for your pet, whether big or small.

Vitar Veterinae® ArtiVit Syrup

JOINT NUTRITION AND REGENERATION

A POWERFUL COMBINATION OF ACTIVE INGREDIENTS AND A PAIN RELIEVER. SUITABLE FOR PREVENTIVE USE IN ANIMALS FROM 4 YEARS OF AGE, AND THERAPEUTICALLY FOLLOWING ORTHOPAEDIC SURGERY, DIAGNOSIS OF HIP DYSPLASIA AND WHEN DISCOMFORT IS CAUSED BY THE LOCOMOTOR SYSTEM.

VITAR Veterinae ArtiVit Syrup contains substances that are crucial for the nutrition of joints. Since it is a syrup, animals consume it easily, even if dosage is given for a long period. Cats and dogs accept it without issue.

It boasts five core mechanisms for the following benefits:

- **Nutrition of joints and joint capsules** (glucosamine sulphate 2KCl and chondroitin sulphate)
- **Anti-inflammatory properties** (MSM – methylsulfonylmethane)
- **Lubrication** of joints and joint capsules (hyaluronic acid)
- **Restores damaged cartilage** (hydrolysed collagen)
- **Pain relief (boswellia serrata)**

Recommended doses:

Small and medium dog breeds of up to 20 kg	5 ml/day
Medium and large dog breeds of 20–40 kg	10 ml/day
Large dog breeds of 40–60 kg	15 ml/day

Standard dose: 5 ml per 20 kg of body weight
 Dosage for cats: 5 ml in total, split over three doses per day.

Measuring cup included.

1000 ml bottle: Each press of the pump dispenses 5 ml.

When to use:

Suitable for cats and dogs from 4–5 years of age, with long-term use for large and heavy dog breeds; those that do regular physical exercise (e.g. canicross and agility); rapidly growing puppies; and animals with obesity. Administer for 3 months followed by a month’s pause in treatment.

Suitable for animals that have undergone orthopaedic surgery, and for those diagnosed with conditions such as hip dysplasia or osteoarthritis. Applicable for painful conditions affecting locomotion. Can be administered continuously.

This veterinary preparation is approved by the Czech Institute for State Control of Veterinary Biologicals and Medicines, ref. no.: 062/15 – C.

Quantity: 200 ml, 500 ml or 1000 ml

Active ingredients	in 5 ml
glucosamine sulphate 2 KCl	100 mg
chondroitin sulphate	50 mg
MSM (methylsulphonylmethan)	50 mg
hydrolysed collagen	700 mg
boswellia serrata extract	20 mg
hyaluronic acid	7 mg
vitamin C	40 mg

Ingredients: sugar, water, hydrolysed collagen, glucosamine sulphate.2KCl, MSM, chondroitin sulphate, L-ascorbic acid (vitamin C), boswellia serrata extract, hyaluronic acid, preservative – potassium sorbate

Vitar Veterinae® ArtiVit Forte

JOINT NUTRITION AND REGENERATION

A POWERFUL COMBINATION OF ACTIVE INGREDIENTS AND A PAIN RELIEVER. SUITABLE FOR PREVENTIVE USE IN ANIMALS FROM 4 YEARS OF AGE, AND THERAPEUTICALLY FOLLOWING ORTHOPAEDIC SURGERY, DIAGNOSIS OF HIP DYSPLASIA AND WHEN DISCOMFORT IS CAUSED BY THE LOCOMOTOR SYSTEM.

ArtiVit Forte contains substances that are crucial for joint cartilage. Unlike the syrup, however, it boasts eight times more active substances. Since it is a powder, it is easy to use, even if dosage is given for a long period. Cats and dogs accept it without issue.

It features five core mechanisms for the following benefits:

- **Nutrition of joints and joint capsules** (glucosamine sulphate 2KCl and chondroitin sulphate)
- **Anti-inflammatory properties** (MSM – methylsulfonylmethane)
- **Lubrication** of joints and joint capsules (hyaluronic acid)
- **Restores damaged cartilage** (hydrolysed collagen)
- **Pain relief** (boswellia serrata)

Recommended doses:

Small and medium dog breeds of up to 20 kg	1 tsp/day
Medium and large dog breeds of 20–40 kg	2 tsp/day
Large dog breeds of 40–60 kg	3 tsp/day
Cats	½ tsp/day
1 tsp = 1 heaped teaspoon	

When to use:

Suitable for cats and dogs from 4–5 years of age, with long-term use for large and heavy dog breeds; those that do regular physical exercise (e.g. canicross and agility); rapidly growing puppies; and animals with obesity. Administer for 3 months followed by a month's pause in treatment.

Suitable for animals that have undergone orthopaedic surgery, and for those diagnosed with conditions such as hip dysplasia or osteoarthritis. Applicable for painful conditions affecting locomotion. Can be administered continuously.

This veterinary preparation is approved by the Czech Institute for State Control of Veterinary Biologicals and Medicines, ref. no.: 059/15 – C.

Quantity: 70 g, 400 g or 600 g

Active ingredients	in 4 g (one heaped teaspoon)
glucosamine sulphate 2 KCl	750 mg
chondroitin sulphate	300 mg
MSM (methylsulphonylmethane)	400 mg
boswellia serrata extract	20 mg
hyaluronic acid	10 mg
collagen	2480 mg
vitamin C	40 mg

Ingredients: hydrolysed collagen, glucosamine sulphate.2KCl, MSM (methylsulphonylmethane), chondroitin sulphate, L-ascorbic acid, boswellia serrata extract, hyaluronic acid

Vitar Veterinae® ArtiVit Pegas MSM

FOR HORSES AND LARGE DOG BREEDS

CRYSTALLINE MSM IN POWDER FORM

ArtiVit Pegas MSM is made up of pure crystalline MSM (methylsulfonylmethane), which solely comprises organically bound sulphur. It contributes to strengthened tendons and ligaments, suppresses pain and inflammation, and promotes muscle regeneration and relaxation. It has strong antioxidant properties, is a unique source of sulphur compounds and exerts a positive action in the body, particularly in relation to damaged cartilage. Sulphur is also involved in the formation of collagen and glucosamine – the basic building blocks of articular cartilage and connective tissue.

Suitable also for preventive usage, especially muscle regeneration and relaxation, and for strengthening the entire musculoskeletal system.

- Significantly relieves pain and reduces inflammation.
- Reduces swelling and accelerates recovery following injury.
- Promotes regeneration of joint cartilage and boosts associated lubrication.
- Aids muscle regeneration; strengthens ligaments, tendons and the entire locomotor system.

Purity of substance 99.95%

Dosage: 1 × 0.08–0.1 g per day per kilogram of weight.

Example doses:

Weight 50 kg – 4 g, i.e. 1 teaspoon (tsp)

Weight 100 kg – 2 tsp

Weight 500 kg – 3 tablespoons

It is possible to add the preparation into animal feed, or mix it with water if required. It can be administered continuously. The product is intended for animals (especially horses and large breeds of dogs).

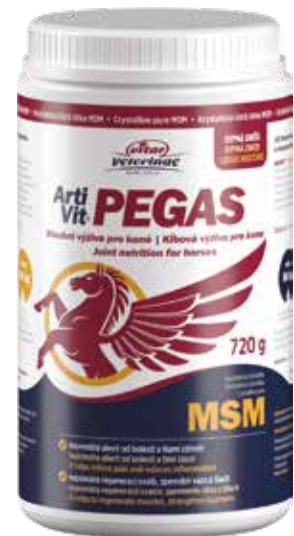

For preventive usage, apply half the amount indicated above.

This veterinary preparation is approved by the Czech Institute for State Control of Veterinary Biologicals and Medicines, ref. no.: 097/18 – C.

Quantity: 720 g of powder

Active ingredients	in 4 g
MSM	4 g

Ingredients: MSM (methylsulphonylmethane)

Article no.:
45000015

Vitar Veterinae® ArtiVit Pegas Forte 7

EXTRA STRONG JOINT NUTRITION FOR HORSES

7 ACTIVE INGREDIENTS IN EXTRA STRONG CONCENTRATION

Artivit® Pegas Forte 7 contains active substances that act synergistically and crucial for the nutrition of joints. The powder form of the preparation makes it easy to administer, even if dosage is given for a long period. It can be added into feed or mixed with water.

It features five core mechanisms for the following benefits:

- Nutrition of joints and joint capsules (glucosamine sulphate 2KCl and chondroitin sulphate).
- Anti-inflammatory properties (MSM – methylsulfonylmethane).
- Lubrication of joints and joint capsules (hyaluronic acid).
- Restores damaged cartilage (hydrolysed collagen).
- Pain relief (boswellia serrata).

Recommended doses:

Therapeutic use (e.g. for acute conditions affecting locomotion or following orthopaedic surgery):

Weight of up to 100 kg – 1 × 4 g/day (1 heaped teaspoon)

Weight in excess of 500 kg – 1 × 20 g (2 tablespoons)

After the condition is somewhat alleviated or for preventive use, administer a half dose (a maintenance dose). Recommended dosage periods: 3 months of use followed by a break of 2 months.

This veterinary preparation is approved by the Czech Institute for State Control of Veterinary Biologicals and Medicines, ref. no.: 122/18 – C.

Quantity: 700 g of powder

Active ingredients	in 4 g	in 1 kg
glucosamine sulphate	1500 mg	375 g
chondroitin sulphate	600 mg	150 g
MSM (methylsulphonylmethane)	1500 mg	375 g
boswellia serrata extract	20 mg	5 g
hyaluronic acid	10 mg	2,5 g
hydrolysed collagen	280 mg	70 g
vitamin C (L-ascorbic acid)	80 mg	20 g

Ingredients: glucosamine sulphate.2KCl, MSM (methylsulphonylmethane), chondroitin sulphate, hydrolysed collagen, L-ascorbic acid, boswellia serrata extract, hyaluronic acid

Vitar Veterinae® GasterOn

STRENGTHENING AND STABILISATION OF INTESTINAL MICROFLORA

GAsterON SYMBIO PROBIOTICS AND PREBIOTICS (FIBRE) A COMPLEX OF PROBIOTIC BACTERIA WITH FIBRE

GasterON Symbio contains active substances in a powder form that help strengthen and stabilise intestinal microflora in cases of acute or chronic diarrhoea and treatment with antibiotics, and following deworming, vaccination, injury or surgery, and in periods of stress.

Featuring a balanced combination of probiotics (four strains) and prebiotics (fructooligosaccharides, "FOS"), the resulting synergistic effect induces natural balance in the digestive and immune systems, enabled by the mutual action of the substances' positive properties.

The probiotics in the blend are present at the amount of 1.5 billion, the strains comprising *Bacillus coagulans*, *Lactobacillus acidophilus*, *Lactobacillus plantarum* and *Lactobacillus rhamnosus*. The prebiotics take the form of fructooligosaccharides GOFOSTM, a water-soluble fibre that nourishes and supports the growth of beneficial intestinal bacteria.

Recommended doses:

Small and medium dog breeds of up to 20 kg	1 spoonful per day
Medium and large dog breeds of 20-40 kg	1-2 spoonful per day
Large dog breeds of 40-60 kg	2 spoonfuls per day

Directions:

It is recommended to add the complex into food or water to support the immunity and digestion of animals. Administer for a duration of 3 months, followed by a month's break prior to resuming treatment. In cases of acute diarrhoea, the dose can be doubled.

Administer for at least 21 days in cases of treatment with antibiotics or instances of digestive disorders (e.g. diarrhea, constipation and flatulence). Give the animal the probiotics at least 2 hours prior to it taking antibiotics.

This veterinary preparation is approved by the Czech Institute for State Control of Veterinary Biologicals and Medicines, ref. no.: 393-22/C.

Quantity: 28 g

Active ingredients	in 280 mg (1 spoonful)
4 probiotic strains: LactoSpore® – <i>Bacillus coagulans</i> <i>Lactobacillus acidophilus</i> <i>Lactobacillus plantarum</i> <i>Lactobacillus rhamnosus</i>	1.5 billion
Fructooligosaccharides FOS	156.6 mg

Ingredients: a mixture of probiotic strains (*Lactobacillus acidophilus*, *Lactobacillus plantarum*, *Lactobacillus rhamnosus*, *Bacillus coagulans*), fructooligosaccharides (FOS; sugar beet fibre), silicon dioxide (drying agent)

Vitar Veterinae® DentON

DENTAL PREPARATIONS FOR DOGS AND CATS

DENTAL PREPARATIONS FOR DOGS AND CATS

This natural preparation for cats and dogs by Vitar Veterinae contains a type of seaweed called ascophyllum nodosum, which helps remove dental plaque and tartar. It also significantly reduces bad breath in cats and dogs.

This preparation acts directly in the digestive tract, from where it enters the bloodstream and ends up in the mouth and saliva, making it highly effective for the teeth and gums. It significantly heightens the capture of plaque-causing bacteria and softens tartar build-up, which either falls away by itself or is easily removed.

Recommended doses:

400 mg - 1 spoonful (measuring spoon included)

Daily doses:

Small dog breeds of up to 10 kg and cats - ½ spoonful
50 g pack = 250 doses; 100 g pack = 500 doses

Dogs of 10-25 kg - 1 spoonful
50 g pack = 125 doses; 100 g pack = 250 doses

Dogs over 25 kg - 2 spoonfuls
50 g pack = 63 doses; 100 g pack = 125 doses

Directions:

Administer once a day by adding the preparation into animal feed. Use regularly. If no result is apparent within 4-8 weeks, double the daily amount.

The preparation is free of artificial colourings, gluten and sugar. Contains non-GMO ingredients. Store in a dry, shaded place in the original container.

This veterinary preparation is approved by the Czech Institute for State Control of Veterinary Biologicals and Medicines, ref. no.: 063/15 - C.

Quantity: 50 g or 100 g

Active ingredients	1 measuring spoon
ascophyllum nodosum	400 mg

Ingredients: Ascophyllum nodosum

Vitar Veterinae® Multivitamin Forte

FOR STRONGER IMMUNITY

Suitable for physically burdened animals, during pregnancy and to improve the physical and mental condition of older dogs and cats. Significantly improves the quality and shine of fur.

A comprehensive multivitamin supplement in the form of a soft jelly chew that pets willingly take. Ideal for long-term use, they are tolerated well by cats and dogs.

Recommended doses:

Small and medium dogs of up to 20 kg and cats ½ a jelly chew/day or 1 every other day
 Medium and large breeds of 20-40 kg 1 jelly chew/day
 Large breeds of 40-60 kg 2 jelly chews/day.

Under special circumstances (e.g. during convalescence), it is possible to administer a double dose for a limited period (maximum 30 days).

This veterinary preparation is approved by the Czech Institute for State Control of Veterinary Biologicals and Medicines, ref. no.: 060/15 - C.

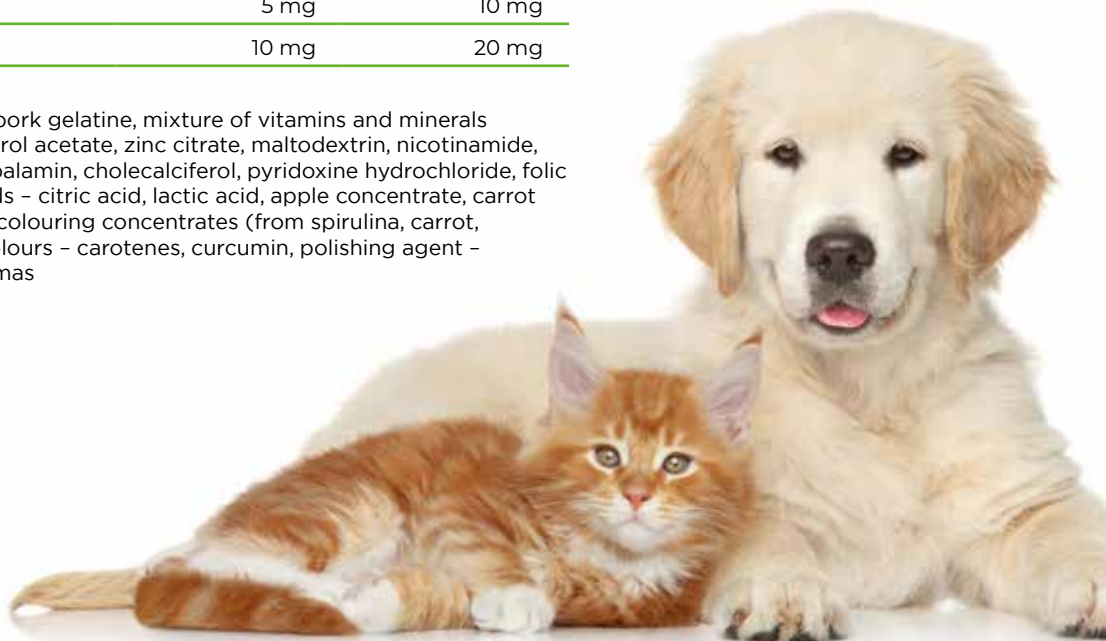

Quantity: 40 jellies (140 g)

Article no.:
4500009

Active ingredients	in 4 g	in 1 kg
vitamin C	40 mg	80 mg
biotin	25 µg	50 µg
vitamin E	6 mg	12 mg
vitamin B6	0.7 mg	1.4 mg
vitamin B12	1.25 µg	2.5 µg
niacin	8 mg	16 mg
pantothenic acid	3 mg	6 mg
folic acid	100 µg	200 µg
vitamin D3	2.5 µg	5 µg
iodine	75 µg	150 µg
zinc	5 mg	10 mg
rose hip extract	10 mg	20 mg

Ingredients: glucose syrup, sugar, pork gelatine, mixture of vitamins and minerals (L-ascorbic acid, DL-alphatocopherol acetate, zinc citrate, maltodextrin, nicotinamide, D-calcium pantothenate, cyanocobalamin, cholecalciferol, pyridoxine hydrochloride, folic acid, potassium iodide, biotin), acids - citric acid, lactic acid, apple concentrate, carrot concentrate, rose hip concentrate, colouring concentrates (from spirulina, carrot, safflower), inverted sugar syrup, colours - carotenes, curcumin, polishing agent - carnauba wax, aromas, natural aromas

Vitar Veterinae® Mineral Forte

FOR HEALTHY BONES, TEETH AND FUR

This preparation for healthy bones, teeth and fur contains Aquamin F – a natural source of mineral substances produced from calcareous marine algae (seaweed) and brewing yeast.

The seaweed is sourced from the North Atlantic from pure, uncontaminated mineral-rich waters. Aquamin F contains **bioactive calcium, magnesium and 74 minerals, as well as trace elements** such as phosphorus, iron, molybdenum, zinc, nickel and copper. Calcium is the core structural component in animal bones that promotes their healthy development and maintains their strength in older age – much like in humans.

Brewing yeast is one of the richest natural sources of B vitamins and certain minerals. The substances in it lend vitality, improve the quality of the skin and fur, act against diarrhoea, aid reproduction, are ideal for lactating females, and promote the proper development of puppies and kittens. It also encourages an appetite.

The substances in the preparation are taken from purely natural sources.

Recommended doses:

4 grams for each 10 kg of the weight of the animal per day.

4 grams represent one teaspoon

Either add it into feed, or mix with water for drinking

This veterinary preparation is approved by the Czech Institute for State Control of Veterinary Biologicals and Medicines, ref. no.: 061/15 – C.

Quantity: 80 g, 500 g or 800 g

Active ingredients	in 4 g (heaped teaspoon)
Aquamin F contains:	2000 mg
calcium 32%	640 mg
magnesium 2.2%	44 mg
Brewer's yeast contains:	2000 mg
vitamin B1	0.14 mg
vitamin B2	0.064 mg
vitamin B6	0.032 mg
vitamin B12	0.042 µg
pantothenic acid	0.06 mg
folic acid	16 µg
niacin	0.86 mg
calcium	5.6 mg
potassium	36 mg
phosphorus	22 mg
iron	0.14 mg
copper	10 µg
manganese	14 µg
zinc	0.1 mg

Ingredients: Aquamin F (sea multimineral complex), brewer's yeast (mixture of vitamins and minerals)

Vitar Veterinae® Salmon Oil

PREMIUM OILS FOR CATS, DOGS & HORSES

DERIVED FROM PURE AND NATURAL SOURCES, THESE PRODUCTS ENSURE PETS GET ALL THE ESSENTIAL SUBSTANCES THEY NEED TO LEAD A HEALTHY LIFE. THE HIGH-QUALITY COMPONENTS THEY CONTAIN ARE METICULOUSLY SELECTED FROM AROUND EUROPE. PRODUCED IN EITHER GERMANY OR BELGIUM, THE TEAM AT VITAR THEN HANDLES AND PACKS THEM WITH THE UTMOST CARE, MAKING THEM IDEAL FOR USE BY BREEDERS.

Vitar Veterinae Salmon Oil is a natural source of essential fatty acids that have significant effects on the entire body, especially the management and coordination of all life processes. They beneficially affect the cardiovascular, muscular, nervous, respiratory, immune and digestive systems.

Administering the oil quickly improves the condition of the skin and fur.

It can lower the risk of cardiovascular diseases, reduce the level of cholesterol in the blood and significantly improve the quality of the coat when taken regularly. Salmon oil has a very positive effect on the function of the immune system. Recommended for animals experiencing reproductive issues.

Recommended doses:

Small dog breeds of up to 10 kg	5 ml/day
Medium and larger dog breeds of 10-25 kg	10 ml/day
Large dog breeds over 25 kg	15 ml/day
Cats	2.5-5 ml/day
Horses	30 ml/day

Article nos.:
45000101
45000102
45000103

Shelf life:

Use within 30 months, and store in a cool and dark place.

Quantity: 200 ml, 500 ml or 1000 ml

Total content of Omega-3 acids: 18%
EPA: 2-5% / DHA: 3-8% / DPA: 1-6%

Ingredients: Salmon oil, Rosmarinus officinalis extract, vitamin E

Vitar Veterinae® Linseed Oil

PREMIUM OILS FOR DOGS, CATS & HORSES

Vitar Veterinae Linseed Oil is obtained from the seeds of common flax (*Linum usitatissimum*). The seeds contain mucilage polysaccharides, proteins, tocopherols, lignans and enzymes. Linseed oil is an excellent source of energy, for example for active dogs in training, in wintertime, or during recovery. It significantly improves the quality and shine of the fur. It is also suitable for young individuals and breastfeeding females.

It helps suppress inflammation or reduce related effects, and prevents certain chronic diseases such as arthritis or diseases affecting the heart and blood vessels. It is also suitable for horses involved in sport or those prone to muscle stiffness.

Recommended doses:

Small dog breeds of up to 10 kg	5 ml/day
Medium and larger dog breeds of 10-25 kg	10 ml/day
Large dog breeds over 25 kg	15 ml/day
Cats	2.5-5 ml/day
Horses	30 ml/day

Shelf life:

Use within 30 months, and store in a cool and dark place.

Quantity: 200 ml, 500 ml or 1000 ml

Article nos.:
45000104
45000105
45000106

Content:

Linolenic acid: 35-65% / Linoleic acid: 11-24%
Oleic acid: 11-35% / Stearic acid: 2-8%
Palmitic acid: 3-8% / Other fatty acids: up to 1%

Ingredients: Raw oil from seeds of *Linum usitatissimum*, *Rosmarinus officinalis* extract, vitamin E

Vitar Veterinae® Hemp Oil

PREMIUM OILS FOR CATS, DOGS & HORSES

Vitar Veterinae Hemp Oil is obtained from the seeds of the hemp plant (*Cannabis sativa*), a source of all 23 naturally occurring amino acids, including 8 essential ones, as well as a high volume of iron, magnesium, manganese, zinc, phosphorus, the vitamins A, D, E and other crucial substances for the body. It is a rich source of unsaturated fatty acids – alpha-linolenic acid and linoleic acid, which support proper function of cell walls and nerves, in addition to the immune and cardiovascular systems. This product boasts an optimal ratio of the essential fatty acids omega-3 and omega-6.

The oil is free of THC or other psychotropic substances that affect consciousness.

Method of production

Hemp oil is obtained from the seeds of the hemp plant, which are cold-pressed in a similar manner as that applied for olive oil. Once extracted from the seeds, the hemp oil is stored in a cool, dark environment for subsequent processing and transport.

Health benefits

A notable aspect is an obvious rise in the intake of omega acids. A diet rich in omega-3 and omega-6 fatty acids contributes to the health of the skin and cardiovascular system, maintenance of good blood pressure and reduction in discomfort and inflammation.

Hemp oil is rich in nutritional content and antioxidants, namely vitamin E, omega-3-6-9 fatty acids, carotene, chlorophyll, calcium, sulphur, magnesium, potassium, phosphorus, zinc and iron.

Hemp seed oil is highly nutritious and particularly beneficial for the skin. Containing vitamins and fatty acids, the oil supports its health and fights against skin conditions. Rich in oils and fatty acids, this product is ideal for nourishing the skin and protecting it from inflammation, oxidation, infection and problems such as eczema, dermatitis and psoriasis.

A healthy brain

The fatty acids in the hemp oil may exert a positive influence on cognitive function and brain function, while other compounds in it (e.g. polyphenols) could serve to safeguard the condition of the brain.

Otherwise, consuming hemp oil has other benefits – supporting heart function and helping combat high blood pressure, atherosclerosis and cholesterol levels. The presence of alpha-linolenic fatty acid in hemp oil has been reported as aiding reduction in the risk of cardiovascular disease. Also referred to as linolenic acid, it is additionally present in fish oils and flaxseed oil.

Recommended doses:

Small dog breeds of up to 10 kg	5 ml/day
Medium and larger dog breeds of 10-25 kg	10 ml/day
Large dog breeds over 25 kg	15 ml/day
Cats	2.5-5 ml/day
Horses	30 ml/day

Quantity: 200 ml, 500 ml or 1000 ml

Content: Linoleic acid: 44.5-65.5%
Alpha-Linolenic acid: 13.5-30.5% / Oleic acid: 5.5-20.5%
Palmitic acid: 4.5-12.5% / Stearic acid: 0.5-4.5%

Ingredients: Raw oil from seeds of *Cannabis sativa*,
Rosmarinus officinalis extract, vitamin E

Article nos.:
45000107
45000108
45000109

Vitar Veterinae® Milk Thistle Oil

PREMIUM OILS FOR CATS, DOGS & HORSES

Cold-pressed purple milk thistle seed oil

A source of essential unsaturated fatty acids, especially omega-6 linoleic acid and antioxidants.

A medicinal plant referred to in ancient manuscripts, milk thistle is a flower from the Asteraceae family that grows in the Mediterranean regions of Europe, North Africa and the Middle East. Its thorny appearance resulted in it being dubbed "the Crown of Christ". Commonly used to treat snakebites in antiquity, it has since been applied to counteract conditions affecting the liver and bile. In addition to supporting the regeneration of blood vessels, it moderates manifestations of varicose veins, lends the body protection from toxic substances and aids sufferers of migraines, depression, asthma and allergies.

Milk thistle is a valuable source of essential fatty acids, vitamins, phytosterols and antioxidants. In pets, the oil helps improve the state of the fur and skin and promotes resistance to oxidative stress on cells and tissues, thereby helping to safeguard the body from external influences.

Besides omega-6 polyunsaturated fatty acids, which are highly beneficial to health and only found in food, the oil contains the vitamins A, B, D and E and important minerals. A powerful antioxidant, it helps alleviate conditions of the fur and skin, supports pets' immunity and significantly boosts energy levels.

- A rich source of vitamin E in natural form.
- High content of omega-6 polyunsaturated fatty acids.
- Helps alleviate problems with the fur and skin.
- Strengthens the immune system.
- Pleasant in taste, it is easy to add it into food.

The health benefits of giving your pet milk thistle oil:

- Contains linoleic acid, which is only present in foodstuffs.
- Aids digestive processes.
- Promotes wound healing and helps combat inflammation and skin diseases.
- Invigorates metabolic processes – a powerful source of energy.
- Suitable for animals with fur and skin conditions.
- Boosts immunity.
- Alleviates muscle stiffness.
- A premium food supplement for daily feed, even for pets on BARF diets (bone and raw foodstuffs, i.e. raw meat, vegetables, fruits and herbs).

Does not contain silymarin.

Recommended doses:

Small dog breeds of up to 10 kg	5 ml/day
Medium and larger dog breeds of 10–25 kg	10 ml/day
Large dog breeds over 25 kg	15 ml/day
Cats	2.5–5 ml/day
Horses	30 ml/day

Quantity: 200 ml, 500 ml or 1000 ml

Content: Linoleic acid: 46–55% / Oleic acid: 15–25%
Palmitic acid: 7–12%

Ingredients: Raw oil from seeds of *Silybum marianum*, *Rosmarinus officinalis* extract, vitamin E

COOPERATION & PRIVATE LABEL GOODS

We are constantly extending our distribution channels. Apart from cooperation based on the sale of our standard assortment, we offer the opportunity to work on the basis of PRIVATE LABEL production and packaging.

VITAR Veterinae Brand Distribution

Sell our pet food supplements in your marketplaces.

Private Label and Contract Manufacturing

You can take advantage of our experience and expertise. The range of our services depends on your needs. We are able to produce a tailor-made product from initial development to creation of the packaging and to your exact specifications. We possess all necessary certification for such production.

CHOOSE THE MOST CONVENIENT FORM AND PACKAGING

Employing the latest in machinery, we can manufacture various forms of food supplements from capsules and tablets of different sizes and shapes, through to preparations as a powder or liquid, e.g. syrups.

In terms of packaging and labelling, we provide versatile solutions most convenient for clients, packaged as plastic tubs, paper or tin caddies, sachets and single-use stick packs.

For enquiries about becoming a Distribution Partner and/or Private Label and Contract Manufacturing options, please contact:
